Title: Vice President, Rates & Regulatory Support

District: Entire Electric Service Area

Tariff No.	.1	
Sheet No.	1 of 3	
Revision No.		
Effective:		

DIRECT ACCESS RESIDENTIAL SCHEDULE NO. 1

AVAILABILITY

In all territory served by Company at all points where facilities of adequate capacity and the required phase and suitable voltage are adjacent to the premises served.

APPLICABILITY

To all single phase or three phase (subject to availability at point of delivery) residential electric service in individual private dwellings and individually metered apartments when all service is supplied at one point of delivery and energy is metered through one meter; however, electric water heating may be metered separately.

Not applicable to resale, breakdown, standby, or auxiliary service or service to individual motors exceeding 40 amperes at a rating of 230 volts or which will cause excessive voltage fluctuations.

CHARACTER OF SERVICE

Single or three phase, 60 Hertz, nominal 120/240 volts.

RATES

Single-Phase Service

A monthly net bill based on the following, as applicable, plus any adjustments incorporated in this Schedule:

Generation (see MGC below) Summer Winter	\$0.060950 Per kWh \$0.048757 Per kWh
Transmission	\$0.007305 Per kWh
Distribution Distribution Primary Distribution Secondary	\$0.015988 Per kWh \$0.007091 Per kWh
Customer Charge-Service Drop	\$2.685628 Per Month
Meter Services Installation Maintenance Equipment	\$0.400543 Per Month \$0.080109 Per Month \$0.320434 Per Month
Meter Reading Services	\$0.513286 Per Month
Billing and Collection Customer Accounting	\$1.000000 Per Month
Demand Side Management	\$0.000617 Per kWh

Revision No. _____
Effective:

DIRECT ACCESS RESIDENTIAL SCHEDULE NO. 1

Uncollectible Accounts

\$0.000133 Per kWh

Customer Information and Lifeline Discount

\$0.000684 Per kWh

Summer billing months are May through October and winter billing months are November through April. Demand-Side Management, Uncollectible Accounts, Customer Information and Lifeline Discount are collectively referred to as the System Benefit Charge (SBC).

Three Phase Service

Same as single-phase service, except three-phase service is subject to the following additional charges:

There is a 3 phase differential of:

\$7,500000 Per Month

Its components are:

Customer Charge-Service Drop

\$1.000000 Per Month

Meter Services

Installation

\$0.812500 Per Month

Maintenance

\$0.812500 Per Month

Equipment

\$4.875000 Per Month

Subtotal

\$6.500000 Per Month

MARKET GENERATION COMPONENT (MGC)

Generation shall further be unbundled between the MGC and the Interim Transition Charge (ITC). The MGC represents a forecast of the market price of generation, usage patterns, ancillary services, capacity reserves, and other necessary generation costs. The MGC shall be filed for each rate class thirty (30) days before the beginning of the subsequent calendar year. The difference between the unbundled generation component and the MGC is the ITC as provided for in the Company's Settlement Agreement.

The MGC shall be deducted from the above generation charge for Direct Access customers.

ARIZONA INDEPENDENT SCHEDULING ADMINISTRATOR (AISA) CHARGE

A charge of \$0.00004473 per kWh shall be applied for costs associated with the implementation of the AISA in Arizona.

TAX CLAUSE

To the charges computed under the above rate, including any adjustments, shall be added the applicable proportionate part of any taxes or governmental impositions which are or may in the future be assessed on the basis of gross revenues of the Company and/or the price or revenue from the electric energy or service sold and/or the volume of energy generated or purchased for sale and/or sold hereunder.

DIRECT ACCESS RESIDENTIAL SCHEDULE NO. 1

RULES AND REGULATIONS

Service Connection Charges

- 1. There shall be a \$13.50 charge for the initial establishment of each new service for each Customer.
- There shall be a \$13.50 charge for the re-establishment of each service for each Customer.

The standard Rules and Regulations of the Company as on file from time to time with the Arizona Corporation Commission shall apply where not inconsistent with this rate schedule.

Optional rates are or may become available for certain classes of Customers. Upon application for service or upon request the Company will assist the Customer in selecting the rate schedule best suited to the Customer's requirements, but Company does not guarantee that Customers will be served under the most favorable rate schedule. Upon written notification of any material changes in Customer's installation, load conditions, or use of service, Company will assist in determining if a change in rates is desirable, but not more than one such change in rates will be made within any twelve month period.

Electric space heating and water heating equipment and installation shall conform to the Company's requirements.

Vice President, Rates & Regulatory Support

District: Entire Electric Service Area

Tariff No.	2	
Sheet No.	1 of 3	
Revision No		
Effective:		

DIRECT ACCESS RESIDENTIAL SCHEDULE NO. 2

AVAILABILITY

This rate is limited to installations and Customers served under Rate No. 2 on the effective date of this tariff sheet.

APPLICABILITY

To separately metered single phase residential off-peak water heating service where general residential service is also provided under Rate No. 1. When service under Rate No. 2 is discontinued, the Company will either combine usage and bill under Rate No. 1.or modify the service entrance equipment so all service is supplied through the Rate No. 1 meter.

Not applicable to three phase service, resale, breakdown, standby, auxiliary, or any other service except off-peak water heating in accordance with the provisions of this rate schedule.

Where service other than water heating to which this rate is applicable has been taken hereunder, the regular rate for such service shall be applied on a monthly basis to all consumption billed hereunder during the previous twelve months less the aggregate of payments made hereunder for the same period of time. The regular rate shall continue to apply until the unauthorized service is permanently separated from the off-peak water heating service.

In the event that unauthorized usage on this rate occurs, the Company may require a credit deposit or similar guarantee to insure payment of future bills.

CHARACTER OF SERVICE

Single phase, 60 Hertz, nominal 120/240 volts.

Service may be controlled by the Company by disconnecting electricity during certain periods of the day not exceeding 8 hours in any 24hour period, as determined by the Company from time to time.

RATE

A monthly net bill based on the following, as applicable, plus any adjustments incorporated in this Schedule:

 \$0.052425 Per kW

 Summer kWh
 \$0.000512 Per kWh

 Winter kWh
 \$0.000486 Per kWh

Summer billing months are May through October and winter billing months are November through April. Demand-Side Management. Uncollectible Accounts, Customer Information and Lifeline Discount are collectively referred to as the System Benefit Charge (SBC).

Additional charges may be directly assigned to a customer pursuant to its contract.

MARKET GENERATION COMPONENT (MGC)

Generation shall further be unbundled between the MGC and the Interim Transition Charge (ITC). The MGC represents a forecast of the market price of generation, usage patterns, ancillary services, capacity reserves, and other necessary generation costs. The MGC shall be filed for each rate class thirty (30) days before the beginning of the subsequent calendar year. The difference between the unbundled generation component and the MGC is the ITC as provided for in the Company's Settlement Agreement.

The MGC shall be deducted from the above generation charge for Direct Access customers.

ARIZONA INDEPENDENT SCHEDULING ADMINISTRATOR (AISA) CHARGE

A charge of \$0.00004473 per kWh shall be applied for costs associated with the implementation of the AISA in Arizona.

BILLING DEMAND

The maximum 15 minute measured demand in the month, but not less than 50% of the maximum demand used for billing purposes in the preceding 11 months, nor less than 50% of the contract demand, nor less than 200 kW.

DIRECT ACCESS LARGE GENERAL SERVICE SCHEDULE NO. 13

ADJUSTMENT FOR TRANSFORMER OWNERSHIP AND METERING

- 1. When Company owns transformers and energy is metered on primary side of transformers, the demand shall be metered and the above schedule subject to a discount of 10.3¢ per kW per month of the billing demand each month.
- 2. When Customer owns transformers and energy is metered on primary side of transformers, the demand shall be metered and the above schedule subject to a discount of 20.6¢ per kW per month of the billing demand each month.
- 3. When Customer owns transformers and, at Company's option, energy is metered on secondary side of transformers, the demand snall be metered and the above schedule subject to a discount of 10.3¢ per kW per month of the billing demand each month.

TAX CLAUSE

To the charges computed under the above rate, including any adjustments, shall be added the applicable proportionate part of any taxes or governmental impositions which are or may in the future be assessed on the basis of gross revenues of the Company and/or the price or revenue from the electric energy or service sold and/or the volume of energy generated or purchased for sale and/or sold hereunder.

RULES AND REGULATIONS

Service Connection Charges

- 1. There shall be a \$13.50 charge for the initial establishment of each new service for each Customer.
- 2. There shall be a \$13.50 charge for the re-establishment of each service for each Customer.

The standard Rules and Regulations of the Company as on file from time to time with the Arizona Corporation Commission shall apply where not inconsistent with this rate schedule.

The Company may require a written contract and a minimum term of contract.

Optional rates are or may become available for certain classes of Customers. Upon application for service or upon request the Company will assist the Customer in selecting the rate schedule best suited to the Customer's requirements, but Company does not guarantee that Customers will be served under the most favorable rate schedule. Upon written notification of any material changes in Customer's installation, load conditions, or use of service, Company will assist in determining if a change in rates is desirable, but not more than one such change in rates will be made within any twelve month period.

DIRECT ACCESS RESIDENTIAL TIME-OF-USE SCHEDULE NO. 21 (FROZEN)

AVAILABILITY

Throughout the entire area where the facilities of the Company are of adequate capacity and are adjacent to the premises. Direct access to the meter during normal working hours is also a prerequisite for this rate schedule.

APPLICABILITY

To any Customer entitled to single phase service under Rate 01. Preference may be given to those Customers whose historic or expected annual usage exceeds 16,000 kWh. Service must be single phase residential electric service in individual private dwellings and individually metered multi-family units when all service is supplied at one point of delivery and energy is metered through one meter; however, controlled off-peak electric water heating may be metered separately.

Not applicable to three phase service, resale, breakdown, temporary, standby, or auxiliary service, or service to individual motors exceeding 40 amperes at a rating of 230 volts or which will cause excessive voltage fluctuations.

The total number of Customers served under this Time-of-Use Rate Schedule is limited to 5,000. Service under this schedule will commence when the appropriate meter has been installed.* Customers must stay on this Rate Schedule for a minimum period of one (1) year.

The waiting list for service under this Time-of-Use Rate Schedule was frozen as of March 31, 1996.

As meters become available from the original group of 5,000, customers on the frozen waiting list will be offered service under this Rate Schedule in the order that they were placed on the waiting list.

Customers currently served under this Rate Schedule that change residences will not be allowed to receive service under this Rate Schedule at their new residence.

CHARACTER OF SERVICE

Single phase, 60 Hertz. nominal 120/240 volts.

TERMS AND CONDITIONS OF SERVICE

- 1. Customer must furnish, install, own, and maintain at each point of delivery ail necessary Company approved equipment which will enable the Company to interrupt service with its master control station.
- 2. Service may be interrupted by Company during certain periods of the day not exceeding six hours in any 24-hour period.
- 3. Company will endeavor to give customer one hour notice of impending interruption; however, service may be interrupted without notice should Company deem such action necessary.
- 4. Where service other than agricultural pumping to which this rate is applicable has been taken hereunder, the general service rate shall be applied on a monthly basis to all usage billed hereunder during the previous twelve months less the aggregate of payments made hereunder for the same period of time. The general service rate shall continue to apply until the unauthorized service is permanently separated from the agricultural pumping service.
- 5. Company shall not be liable for any loss or damage caused by or resulting from any interruption of service.

RULES AND REGULATIONS

The standard Rules and Regulations of the Company as on file from time to time with the Arizona Corporation Commission shall apply where not inconsistent with this rate schedule.

The Company may require a written contract.

Optional rates are or may become available for certain classes of Customers. DIRECT ACCESS MUNICIPAL WATER PUMPING SCHEDULE NO. 43

AVAILABILITY

Available for service to the City of Tucson Water Utility and private water Companies where the facilities of the Company are of adequate capacity and are adjacent to the premises.

APPLICABILITY

Applicable for service to booster stations and wells used for domestic water supply.

Not applicable to resale, breakdown, standby, or auxiliary service.

CHARACTER OF SERVICE

Single or three phase, 60 Hertz, and at one standard nominal voltage as elected by Customer and subject to availability at point of delivery approved by the Company. Primary metering may be used by mutual agreement.

RATE

A monthly net bill based on the following, as applicable, plus any adjustments incorporated in this Schedule:

Firm Service:

Effective:		

DIRECT ACCESS MUNICIPAL WATER PUMPING SCHEDULE NO. 43

Primary Voltage Discount

A discount of 5% will be allowed from the above rates where Customer owns the transformers and service is metered at primary voltage.

MARKET GENERATION COMPONENT (MGC)

Generation shall further be unbundled between the MGC and the Interim Transition Charge (ITC). The MGC represents a forecast of the market price of generation, usage patterns, ancillary services, capacity reserves, and other necessary generation costs. The MGC shall be filed for each rate class thirty (30) days before the beginning of the subsequent calendar year. The difference between the unbundled generation component and the MGC is the ITC as provided for in the Company's Settlement Agreement.

The MGC shall be deducted from the above generation charge for Direct Access customers.

ARIZONA INDEPENDENT SCHEDULING ADMINISTRATOR (AISA) CHARGE

A charge of \$0.00004473 per kWh shall be applied for costs associated with the implementation of the AISA in Arizona.

TAX CLAUSE

To the charges computed under the above rate, including any adjustments, shall be added the applicable proportionate part of any taxes or governmental impositions which are or may in the future be assessed on the basis of gross revenues of the Company and/or the price or revenue from the electric energy or service sold and/or the volume of energy generated or purchased for sale and/or sold hereunder.

TERMS AND CONDITIONS OF INTERRUPTIBLE SERVICE

- Customer must furnish, install, own, and maintain at each point of delivery all necessary Company approved equipment which will enable the Company to interrupt service with its master control station.
- Service may be interrupted by Company during certain periods of the day not exceeding six hours in any 24-hour period.
- Company will endeavor to give Customer one hour notice of impending interruption; however, service may be interrupted without notice should Company deem such action necessary.
- 4. The interruptible load shall be separately served and metered and shall at no time be connected to facilities serving Customer's firm load. Conversely, the firm load shall be separately served and metered and shall at no time be connected to facilities serving Customer's interruptible load.
- 5. Company shall not be liable for any loss or damage caused by or resulting from any interruption of service.

RULES AND REGULATIONS

The standard Rules and Regulations of the Company as on file from time to time with the Arizona Corporation Commission shall apply where not inconsistent with this rate schedule.

The Company may require a written contract.

DIRECT ACCESS RESIDENTIAL TIME-OF-USE SCHEDULE NO. 70

AVAILABILITY

Throughout the entire area where the facilities of the Company are of adequate capacity and are adjacent to the premises. Direct access to the meter during normal working hours is also a prerequisite for this rate schedule.

APPLICABILITY

To any Customer entitled to single phase service under Rate No. 01. Service is available to individual private dwellings and individually metered multi-family units when all service is supplied at one point of delivery and energy is metered through one meter; however, controlled off-peak electric water heating may be metered separately.

Not applicable to three phase service, resale, breakdown, temporary, standby, or auxiliary service, or service to individual motors exceeding 40 amperes at a rating of 230 voits or which will cause excessive voltage fluctuations.

Service under this schedule will commence when the appropriate meter has been installed.* Customers must stay on this Rate Schedule for a minimum period of one (1) year. A Customer, at his/her discretion and after being served for a twelve (12) month period under Rate No. 70, may opt to switch service to the Company's non-time-of-use Residential Rate No. 1. The Company shall refund to the Customer any excess moneys paid in total over the entire twelve months under Rate No. 70 that would not have been paid under Rate No. 1. A Customer shall be eligible to receive such a refund of excess moneys on a single occasion only.

CHARACTER OF SERVICE

Single phase, 60 Hertz, nominal 120/240 volts.

RATES

A monthly net bill based on the following, as applicable, plus any adjustments incorporated in this Schedule:

Generation (see MGC below) Summer Peak Summer Shoulder Summer Off-Peak	\$0.156093 Per kWh \$0.086863 Per kWh \$0.027523 Per kWh

DIRECT ACCESS RESIDENTIAL TIME-OF-USE SCHEDULE NO. 70

RULES AND REGULATIONS

Service Connection Charges

- 1. There shall be a \$13.50 charge for the initial establishment of each new service for each Customer.
- 2. There shall be a \$13.50 charge for the re-establishment of each service for each Customer.

The standard Rules and Regulations of the Company as on file from time to time with the Arizona Corporation Commission shall apply where not inconsistent with this rate schedule.

Optional rates are or may become available for certain classes of Customers. Upon application for service or upon request the Company will assist the Customer in selecting the rate schedule best suited to the Customer's requirements, but Company does not guarantee that Customers will be served under the most favorable rate schedule. Upon written notification of any material changes in Customer's installation, load conditions, or use of service, Company will assist in determining if a change in rates is desirable, but not more than one such change in rates will be made within any twelve month period.

Electric space heating and water heating equipment and installation shall conform to the Company's requirements.

*This Rate Schedule requires a type of meter that is not normally used; therefore, the Company makes no guarantee that meters will be installed within any specific time. However, the Company will make its best effort to install the special meter within a reasonable time.

The Company has the option to price service in the billing months of May and October at lower levels, which levels shall not be less than marginal cost. Any shoulder consumption remaining from October usage will be billed at the summer shoulder price in following billing months.

Summer billing months are May through October and winter billing months are November through April.

The summer Cn-Peak period is 1:00 p.m. to 6:00 p.m., Monday through Friday (excluding Memorial Day, Independence Day, and Labor Day). The summer Shoulder period is 6:00 p.m. to 8:00 p.m., Monday through Friday (excluding Memorial Day, Independence Day, and Labor Day). The winter On-Peak periods are 7:00 a.m. - 11:00 a.m. and 6:00 p.m. - 9:00 p.m., Monday through Friday (excluding Thanksgiving Day, Christmas Day, and New Year's Day). All other hours are Off-Peak. If a holiday falls on Saturday, the preceding Friday is designated Off-Peak; if a holiday falls on Sunday, the following Monday is designated Off-Peak.

ADJUSTMENT FOR TRANSFORMER OWNERSHIP AND METERING

1. When Company owns transformers and energy is metered on primary side of transformers, the demand shall be metered and the above schedule subject to a discount of 10.3¢ per kW per month of the billing demand each month.

Tucson, Arizona

DIRECT ACCESS GENERAL SERVICE TIME-OF-USE SCHEDULE NO. 76

- 2. When Customer owns transformers and energy is metered on primary side of transformers, the demand shall be metered and the above schedule subject to a discount of 20.6¢ per kW per month of the billing demand each month.
- 3. When Customer owns transformers and, at Company's option, energy is metered on secondary side of transformers, the demand shall be metered and the above schedule subject to a discount of 10.3¢ per kW per month of the billing demand each month.

MARKET GENERATION COMPONENT (MGC)

Generation shall further be unbundled between the MGC and the Interim Transition Charge (ITC). The MGC represents a forecast of the market price of generation, usage patterns, ancillary services, capacity reserves, and other necessary generation costs. The MGC shall be filed for each rate class thirty (30) days before the beginning of the subsequent calendar year. The difference between the unbundled generation component and the MGC is the ITC as provided for in the Company's Settlement Agreement.

The MGC shall be deducted from the above generation charge for Direct Access customers.

ARIZONA INDEPENDENT SCHEDULING ADMINISTRATOR (AISA) CHARGE

A charge of \$0.00004473 per kWh shall be applied for costs associated with the implementation of the AISA in Arizona.

TAX CLAUSE

To the charges computed under the above prices, including any adjustments, shall be added the applicable proportionate part of any taxes or governmental impositions which are or may in the future be assessed on the basis of gross revenues of the Company and/or the price or revenue from the electric energy or service sold and/or the volume of energy generated or purchased for sale and/or sold hereunder.

RULES AND REGULATIONS

Service Connection Charges

- 1. There shall be a \$13.50 charge for the initial establishment of each new service for each Customer.
- There shall be a \$13.50 charge for the re-establishment of each service for each Customer.

The standard Rules and Regulations of the Company as on file from time to time with the Arizona Corporation Commission shall apply where not inconsistent with this Schedule.

The Company may require a written contract and a minimum term of contract.

Optional price schedules are or may become available for certain classes of Customers. Upon application for service or upon request the Company will assist the Customer in selecting the price schedule best suited to the Customer's requirements, but the Company does not guarantee that Customers will be served under the most favorable price schedule. Upon written notification of any material changes in Customer's installation, load conditions, or use of service. Company will assist in determining if a change in price schedule is desirable, but not more than one such change in price schedule will be made within any twelve month period.

*This Schedule requires a type of meter not normally used; therefore, the Company makes no guarantee that the meters will be installed within any specific time. However, the Company will make its best effort to install the special meter within a reasonable time.

DIRECT ACCESS TIME-OF-USE LARGE LIGHT AND POWER SCHEDULE NO. 90A

AVAILABILITY

Price Schedule No. 90 shall be available for any Customer within the service territory of the Company if the Company has facilities of adequate capacity and a written contract, covering such matters as the Company and Customer shall deem appropriate. Service under this Schedule shall commence when the appropriate meter has been installed.*

CHARACTER OF SERVICE

Service shall be three phase, 60 Hertz, and shall be supplied directly from any 46,000 volt, or higher voltage, system through distribution facilities used exclusively to serve Price Schedule No. 90 customers at a delivery voltage of not less than 2400/4160 volts and delivered at a single point of delivery unless otherwise specified in the contract.

RATES -

A monthly net bill based on the following, as applicable, plus any adjustments incorporated in this Schedule:

· Winter kWh - Off Peak	\$0.000403 Per kWh

Demand-Side Management, Uncollectible Accounts, Customer Information and Lifeline Discount are collectively referred to as the System Benefit Charge (SBC).

Additional charges may be directly assigned to a customer pursuant to its contract.

Excess shoulder demand is defined as that positive amount (if any) by which shoulder demand exceeds 150% of on-peak period demand.

Excess off-peak demand is defined as:

- that positive amount by which off-peak period demand exceeds shoulder period demand (when and if shoulder period demand is greater than 150% of the on-peak period demand and off-peak period demand exceeds shoulder period demand), or:
- 2. that positive amount by which off-peak period demand exceeds 150% of the on-peak period demand (when and if shoulder period demand is less than 150% of the on-peak period demand and off-peak period demand exceeds 150% of the on-peak period demand), or;
- zero when the above conditions in I are not met and the above conditions in II are not met.

In the event that excess shoulder and/or excess off-peak demand occur, excess shoulder demand shall be billed at the shoulder price and excess off-peak demand shall be billed at the off-peak price.

Any shoulder consumption remaining from October usage shall be billed at the summer shoulder price in following billing months.

Summer biiling months are May through October and winter biiling months are November through April.

The summer On-Peak period is 1:00 p.m. to 6:00 p.m., Monday through Friday (excluding Memorial Day, Independence Day, and Labor Day). The summer Shoulder period is 6:00 p.m. to 8:00 p.m., Monday through Friday (excluding Memorial Day, Independence Day, and Labor Day). The winter On-Peak periods are 7:00 a.m. - 11:00 a.m. and 6:00 p.m. - 9:00 p.m., Monday through Friday (excluding Thanksgiving Day, Christmas Day, and New Year's Day). All other hours are Off-Peak. If a holiday fails

Tariff No. Sheet No. 4 of 5 Revision No. Effective:

DIRECT ACCESS TIME-OF-USE LARGE LIGHT AND POWER SCHEDULE NO. 90A

on Saturday, the preceding Friday is designated Off-Peak; if a holiday falls on Sunday, the following Monday is designated Off-Peak.

BILLING DEMAND

The billing demand shall be specified in the contract, but shall not be less than 3,000 kW. Additionally, the On-Peak billing demand shall not be less than 66.67% of the maximum On-Peak billing demand in the preceding eleven (11) months, unless otherwise specified in the contract.

POWER FACTOR ADJUSTMENT

Prices are subject to a discount or a charge of 1.3¢ per kW of billing demand for each 1% the average monthly power factor is above or below 90% lagging to a maximum discount of 13.0¢ per kW of billing demand per month.

MARKET GENERATION COMPONENT (MGC)

Generation shall further be unbundled between the MGC and the Interim Transition Charge (ITC). The MGC represents a forecast of the market price of generation, usage patterns, ancillary services, capacity reserves, and other necessary generation costs. The MGC shall be filed for each rate class thirty (30) days before the beginning of the subsequent calendar year. The difference between the unbundled generation component and the MGC is the ITC as provided for in the Company's Settlement Agreement.

The MGC shall be deducted from the above generation charge for Direct Access customers.

ARIZONA INDEPENDENT SCHEDULING ADMINISTRATOR (AISA) CHARGE

A charge of \$0.00004473 per kWh shall be applied for costs associated with the implementation of the AISA in Arizona.

TAX CLAUSE

To the charges computed under the above prices, including any adjustments, shall be added the applicable proportionate part of any taxes or governmental impositions which are or may in the future be assessed on the basis of gross revenues of the Company and/or the price or revenue from the electric energy or service sold and/or the volume of energy generated or purchased for sale and/or sold hereunder.

RULES AND REGULATIONS

The standard Rules and Regulations of the Company as on file from time to time with the Arizona Corporation Commission shall apply where not inconsistent with this Schedule.

The Company shall require a written contract and a minimum term of contract.

Optional price schedules are or may become available for certain classes of Customers. Upon application for service or upon request the Company will assist the Customer in selecting the price schedule best suited to the Customer's requirements, but Company does not guarantee that Customers will be served under the most favorable schedule. Upon written notification of any material changes in Customer's installation, load conditions, or use of service, the Company shall assist in determining if a change in schedule is desirable, but not more than one such change shall be made within any twelve month period.

<u>DIRECT ACCESS</u> SPECIAL RESIDENTIAL SCHEDULE NO. 201

AVAILABILITY

In all territory served by Company at all points where facilities of adequate capacity and the required phase and suitable voltage are adjacent to the premises served. Direct access to the meter during normal working hours is also a prerequisite for Options B & C of this Schedule.

APPLICABILITY

To single phase or three phase (Option A only) (subject to availability at point of delivery) residential electric service in individual private dwellings when all service is supplied at one point of delivery and energy is metered through one meter. Additionally, this Schedule requires that the customer use exclusively the Company's service for all space heating and all water heating energy requirements except as provided below and that the customer's home conform to the standards of the Good Cents program as in effect at the time of subscription to this Schedule. Notwithstanding the above, the customer's use of solar energy for any purpose shall not preclude subscription to this Schedule. Three different Options are available under this Schedule: A, B, & C. Subscription eligibility requirements are as follows:

Option A:

Customer must meet conditions outlined above.

Option B:

Customer must meet conditions required for option A and must purchase under the time-of-use structure applicable to

Option B. Applicable only to single phase service.

Option C:

Customer must meet above conditions required for option A, must use either (i.) solar equipment for water heating requirements during the year or (ii.) an electric heat pump water heater, or both (i.) and (ii.), and must purchase under the

time-of-use structure applicable to Option C. Applicable only to single phase service.

Not applicable to resale, breakdown, temporary, standby, or auxiliary service or service to individual motors exceeding 40 amperes at a rating of 230 volts or which will cause excessive voltage fluctuations.

Service under Option B or Option C of this Schedule will commence when the appropriate meter has been installed.* Customers must stay on Option B or Option C of this Schedule for a minimum period of one (1) year. A Customer, at his/her discretion and after being served for a twelve (12) month period under Option B or Option C of this Schedule, may opt to switch service to the non-time-of-use Option A of this Schedule. The Company shall refund to the Customer any excess moneys paid in total over the entire twelve months under Rate No. 201, Option B or Option C that would not have been paid under Rate No. 1. A Customer shall be eligible to receive such a refund of excess moneys on a single occasion only.

CHARACTER OF SERVICE

Option A:

Single or three phase, 60 Hertz. nominal 120/240 volts.

Option B:

Single phase only, 60 Hertz, nominal 120/240 volts.

Option C:

Single phase only, 60 Hertz, nominal 120/240 volts.

MARKET GENERATION COMPONENT (MGC) - Applies to all Options

Generation shall further be unbundled between the MGC and the Interim Transition Charge (ITC). The MGC represents a forecast of the market price of generation, usage patterns, ancillary services, capacity reserves, and other necessary generation costs. The MGC shall be filed for each rate class thirty (30) days before the beginning of the subsequent calendar year. The difference between the unbundled generation component and the MGC is the ITC as provided for in the Company's Settlement Agreement.

The MGC shall be deducted from the above generation charge for Direct Access customers.

ARIZONA INDEPENDENT SCHEDULING ADMINISTRATOR (AISA) CHARGE

A charge of \$0.00004473 per kWh shall be applied for costs associated with the implementation of the AISA in Arizona.

TAX CLAUSE - Applies to all Options

To the charges computed under the above prices, including any adjustments, shall be added the applicable proportionate part of any taxes or governmental impositions which are or may in the future be assessed on the basis of gross revenues of the Company and/or the price or revenue from the electric energy or service sold and/or the volume of energy generated or purchased for sale and/or sold hereunder.

RULES AND REGULATIONS - Applies to all Options

Service Connection Charges

- There shall be a \$13.50 charge for the initial establishment of each new service for each Customer. 1
- 2. There shall be a \$13.50 charge for the re-establishment of each service for each Customer.

The standard Rules and Regulations of the Company as on file from time to time with the Arizona Corporation Commission shall apply where not inconsistent with this Schedule.

Optional price schedules are or may become available for certain classes of Customers. Upon application for service or upon request the Company will assist the Customer in selecting the price schedule best suited to the Customer's requirements, but Company does not quarantee that Customers will be served under the most favorable schedule. District: Entire Electric Service Area

Tariff No	2	
Sheet No.	1 of 3	
Revision No.		
Effective:		

STANDARD OFFER **RESIDENTIAL SCHEDULE NO. 2**

AVAILABILITY

This rate is limited to installations and Customers served under Rate No. 2 on the effective date of this tariff sheet.

APPLICABILITY

To separately metered single phase residential off-peak water heating service where general residential service is also provided under Rate No. 1. When service under Rate No. 2 is discontinued, the Company will either combine usage and bill under Rate No. 1 or modify the service entrance equipment so all-service is supplied through the Rate No. 1 meter.

Not applicable to three phase service, resale, breakdown, standby, auxiliary, or any other service except off-peak water heating in accordance with the provisions of this rate schedule.

Where service other than water heating to which this rate is applicable has been taken hereunder, the regular rate for such service shall be applied on a monthly basis to all consumption billed hereunder during the previous twelve months less the aggregate of payments made hereunder for the same period of time. The regular rate shall continue to apply until the unauthorized service is permanently separated from the off-peak water heating service.

In the event that unauthorized usage on this rate occurs, the Company may require a credit deposit or similar guarantee to insure payment of future bills.

CHARACTER OF SERVICE

Single phase, 60 Hertz, nominal 120/240 volts.

Service may be controlled by the Company by disconnecting electricity during certain periods of the day not exceeding 8 hours in any 24hour period, as determined by the Company from time to time.

Additional charges may be directly assigned to a customer pursuant to its contract.

MARKET GENERATION COMPONENT (MGC)

Generation shall further be unbundled between the MGC and the Interim Transition Charge (ITC). The MGC represents a forecast of the market price of generation, usage patterns, ancillary services, capacity reserves, and other necessary generation costs. The MGC shall be filed for each rate class thirty (30) days before the beginning of the subsequent calendar year. The difference between the unbundled generation component and the MGC is the ITC as provided for in the Company's Settlement Agreement.

ARIZONA INDEPENDENT SCHEDULING ADMINISTRATOR (AISA) CHARGE

A charge of \$0.00004473 per kWh shall be applied for costs associated with the implementation of the AISA in Arizona.

BILLING DEMAND

The maximum 15 minute measured demand in the month, but not less than 50% of the maximum demand used for billing purposes in the preceding 11 months, nor less than 50% of the contract demand, nor less than 200 kW.

STANDARD OFFER LARGE GENERAL SERVICE SCHEDULE NO. 13

ADJUSTMENT FOR TRANSFORMER OWNERSHIP AND METERING

- 1. When Company owns transformers and energy is metered on primary side of transformers, the demand shall be metered and the above schedule subject to a discount of 10.3¢ per kW per month of the billing demand each month.
- 2. When Customer owns transformers and energy is metered on primary side of transformers, the demand shall be metered and the above schedule subject to a discount of 20.6¢ per kW per month of the billing demand each month.
- 3. When Customer owns transformers and, at Company's option, energy is metered on secondary side of transformers, the demand shall be metered and the above schedule subject to a discount of 10.3¢ per kW per month of the billing demand each month.

TAX CLAUSE

To the charges computed under the above rate, including any adjustments, shall be added the applicable proportionate part of any taxes or governmental impositions which are or may in the future be assessed on the basis of gross revenues of the Company and/or the price or revenue from the electric energy or service sold and/or the volume of energy generated or purchased for sale and/or sold hereunder.

RULES AND REGULATIONS.

Service Connection Charges

- There shall be a \$13.50 charge for the initial establishment of each new service for each Customer. 1.
- There shall be a \$13.50 charge for the re-establishment of each service for each Customer. 2.

The standard Rules and Regulations of the Company as on file from time to time with the Arizona Corporation Commission shall apply where not inconsistent with this rate schedule.

The Company may require a written contract and a minimum term of contract.

Optional rates are or may become available for certain classes of Customers. Upon application for service or upon request the Company will assist the Customer in selecting the rate schedule best suited to the Customer's requirements, but Company does not guarantee that Customers will be served under the most favorable rate schedule. Upon written notification of any material changes in Customer's installation. load conditions, or use of service, Company will assist in determining if a change in rates is desirable, but not more than one such change in rates will be made within any twelve month period.

Effective:		

STANDARD OFFER RESIDENTIAL TIME-OF-USE SCHEDULE NO. 21 (FROZEN)

AVAILABILITY

Throughout the entire area where the facilities of the Company are of adequate capacity and are adjacent to the premises. Direct access to the meter during normal working hours is also a prerequisite for this rate schedule.

APPLICABILITY

To any Customer entitled to single phase service under Rate 01. Preference may be given to those Customers whose historic or expected annual usage exceeds 16,000 kWh. Service must be single phase residential electric service in individual private dwellings and individually metered multi-family units when all service is supplied at one point of delivery and energy is metered through one meter; however, controlled off-peak electric water heating may be metered separately.

Not applicable to three phase service, resale, breakdown, temporary, standby, or auxiliary service, or service to individual motors exceeding 40 amperes at a rating of 230 volts or which will cause excessive voltage fluctuations.

The total number of Customers served under this Time-of-Use Rate Schedule is limited to 5,000. Service under this schedule will commence when the appropriate meter has been installed.* Customers must stay on this Rate Schedule for a minimum period of one (1) year.

The waiting list for service under this Time-of-Use Rate Schedule was frozen as of March 31, 1996.

As meters become available from the original group of 5,000, customers on the frozen waiting list will be offered service under this Rate Schedule in the order that they were placed on the waiting list.

Customers currently served under this Rate Schedule that change residences will <u>not</u> be allowed to receive service under this Rate Schedule at their new residence.

CHARACTER OF SERVICE

Single phase, 60 Hertz, nominal 120/240 volts.

ARIZONA INDEPENDENT SCHEDULING ADMINISTRATOR (AISA) CHARGE

A charge of \$0.00004473 per kWh shall be applied for costs associated with the implementation of the AISA in Arizona.

TAX CLAUSE

To the charges computed under the above rate, including any adjustments, shall be added the applicable proportionate part of any taxes or governmental impositions which are or may in the future be assessed on the basis of gross revenues of the Company and/or the price or revenue from the electric energy or service sold and/or the volume of energy generated or purchased for sale and/or sold hereunder.

TERMS AND CONDITIONS OF SERVICE

- 1. Customer must furnish, install, own, and maintain at each point of delivery all necessary Company approved equipment which will enable the Company to interrupt service with its master control station.
- 2. Service may be interrupted by Company during certain periods of the day not exceeding six hours in any 24-hour period.
- 3. Company will endeavor to give customer one hour notice of impending interruption; however, service may be interrupted without notice should Company deem such action necessary.
- 4. Where service other than agricultural pumping to which this rate is applicable has been taken hereunder, the general service rate shall be applied on a monthly basis to all usage billed hereunder during the previous twelve months less the aggregate of payments made hereunder for the same period of time. The general service rate shall continue to apply until the unauthorized service is permanently separated from the agricultural pumping service.
- 5. Company shall not be liable for any loss or damage caused by or resulting from any interruption of service.

RULES AND REGULATIONS

The standard Rules and Regulations of the Company as on file from time to time with the Arizona Corporation Commission shall apply where not inconsistent with this rate schedule.

The Company may require a written contract.

Optional rates are or may become available for certain classes of Customers. Upon application for service or upon request the Company will assist the Customer in selecting the rate schedule best suited to the Customer's requirements, but Company does not guarantee that Customers will be served under the most favorable rate schedule. Upon written notification of any material changes in Customer's installation, load conditions, or use of service, Company will assist in determining if a change in rates is desirable, but not more than one such change in rates will be made within any twelve month period.

Customer Information and Lifeline Discount

All kWh

\$0,000566 Per kWh

Demand-Side Management, Uncollectible Accounts, Customer Information and Lifeline Discount are collectively referred to as the System Benefit Charge (SBC).

MARKET GENERATION COMPONENT (MGC)

Generation shall further be unbundled between the MGC and the Interim Transition Charge (ITC). The MGC represents a forecast of the market price of generation, usage patterns, ancillary services, capacity reserves, and other necessary generation costs. The MGC shall be filed for each rate class thirty (30) days before the beginning of the subsequent calendar year. The difference between the unbundled generation component and the MGC is the ITC as provided for in the Company's Settlement Agreement.

ARIZONA INDEPENDENT SCHEDULING ADMINISTRATOR (AISA) CHARGE

A charge of \$0.00004473 per kWh shall be applied for costs associated with the implementation of the AISA in Arizona.

TAX CLAUSE

To the charges computed under the above rate, including any adjustments, shall be added the applicable proportionate part of any taxes or governmental impositions which are or may in the future be assessed on the basis of gross revenues of the Company and/or the price or revenue from the electric energy or service sold and/or the volume of energy generated or purchased for sale and/or sold hereunder.

RULES AND REGULATIONS

The standard Rules and Regulations of the Company as on file from time to time with the Arizona Corporation Commission shall apply where not inconsistent with this rate schedule.

The Company may require a written contract.

Where the Customer's utilization equipment is operated on a fixed schedule and can be readily and efficiently inspected by the Company to verify its demand and/or kWh usage, the Company may supply unmetered service under this Rate Schedule upon the basis of the demand and/or kWh usage determined by the Company. The Company reserves the right at any time to meter service previously supplied on an unmetered basis. The Customer will be responsible for notifying the Company of any changes being made in the equipment connected to the system. The determined demand and/or kWh usage will be adjusted as equipment is changed.

STANDARD OFFER RESIDENTIAL TIME-OF-USE SCHEDULE NO. 70

AVAILABILITY

Throughout the entire area where the facilities of the Company are of adequate capacity and are adjacent to the premises. Direct access to the meter during normal working hours is also a prerequisite for this rate schedule.

APPLICABILITY

To any Customer entitled to single phase service under Rate No. 01. Service is available to individual private dwellings and individually metered multi-family units when all service is supplied at one point of delivery and energy is metered through one meter; however, controlled off-peak electric water heating may be metered separately.

Not applicable to three phase service, resale, breakdown, temporary, standby, or auxiliary service, or service to individual motors exceeding 40 amperes at a rating of 230 volts or which will cause excessive voltage fluctuations.

Service under this schedule will commence when the appropriate meter has been installed.* Customers must stay on this Rate Schedule for a minimum period of one (1) year. A Customer, at his/her discretion and after being served for a twelve (12) month period under Rate No. 70, may opt to switch service to the Company's non-time-of-use Residential Rate No. 1. The Company shall refund to the Customer any excess moneys paid in total over the entire twelve months under Rate No. 70 that would not have been paid under Rate No. 1. A Customer shall be eligible to receive such a refund of excess moneys on a single occasion only.

CHARACTER OF SERVICE

Single phase, 60 Hertz, nominal 120/240 volts.

RATES

A monthly net bill based on the following, as applicable, plus any adjustments incorporated in this Schedule:

STANDARD OFFER RESIDENTIAL TIME-OF-USE SCHEDULE NO. 70

RULES AND REGULATIONS

Service Connection Charges

- There shall be a \$13.50 charge for the initial establishment of each new service for each Customer. 1.
- There shall be a \$13.50 charge for the re-establishment of each service for each Customer. 2.

The standard Rules and Regulations of the Company as on file from time to time with the Arizona Corporation Commission shall apply where not inconsistent with this rate schedule.

Optional rates are or may become available for certain classes of Customers. Upon application for service or upon request the Company will assist the Customer in selecting the rate schedule best suited to the Customer's requirements, but Company does not quarantee that Customers will be served under the most favorable rate schedule. Upon written notification of any material changes in Customer's installation, load conditions, or use of service, Company will assist in determining if a change in rates is desirable, but not more than one such change in rates will be made within any twelve month period.

Electric space heating and water heating equipment and installation shall conform to the Company's requirements.

*This Rate Schedule requires a type of meter that is not normally used; therefore, the Company makes no guarantee that meters will be installed within any specific time. However, the Company will make its best effort to install the special meter within a reasonable time.

STANDARD OFFER GENERAL SERVICE TIME-OF-USE SCHEDULE NO. 76

AVAILABILITY

Throughout the entire area where the facilities of the Company are of adequate capacity and are adjacent to the premises. Direct access to the meter during normal working hours is also a prerequisite for this Schedule. Service hereunder shall be limited to either an aggregate customer total of 30 MW or an aggregate customer total of 130,000,000 kWh annually, whichever total is reached first.

APPLICABILITY

To any Customer entitled to service under Price Schedule No. 10. Service under this Schedule will commence when the appropriate meter has been installed.*

Customers must stay on this Schedule for a minimum period of one (1) year. A Customer, at his/her discretion and after being served for a twelve (12) month period under Price Schedule No. 76, may opt to switch service to the Company's non-time-of-use General Service Price Schedule No. 10. The Company shall refund to the Customer any excess moneys paid in total over the entire twelve months under Price Schedule No. 76 that would not have been paid under Price Schedule No. 10. A Customer shall be eligible to receive such a refund of excess moneys on a single occasion only.

Not applicable to resale, breakdown, standby, or auxiliary service.

CHARACTER OF SERVICE

Single or three phase, 60 Hertz, and at one standard nominal voltage as mutually agreed and subject to availability at point of delivery. Primary metering may be used by mutual agreement.

Single Phase Service

A monthly net bill based on the following, as applicable, plus any adjustments incorporated in this Schedule:

Generation (see MGC below)	
Summer Peak	\$ 0.195612 <i>Per kWh</i>
Summer Shoulder	\$0.111547 Per kWh
Summer Off-Peak	\$0.037372 Per kWh
Winter Peak	\$0.121437 Per kWh
Winter Off-Peak	\$0.022537 Per kWh
Transmission	\$0.007382 Per kWh
Distribution	
Distribution Primary	\$0.016301 Per kWh
Distribution Secondary	\$0.006724 Per kWh
Customer Charge-Service Drop	\$2.685628 Per Month
Meter Services	
Installation	\$1.360543 Fer Month

Customer Information and Lifeline Discount

\$0.000693 Per kWh

Demand-Side Management, Uncollectible Accounts, Customer Information and Lifeline Discount are collectively referred to as the System Benefit Charge (SBC).

Three Phase Service

Same as Single Phase Service, except three phase service is subject to the following additional charges:

There is a 3 phase differential of: \$7.500000

Its components are:

\$1,000000 Customer Charge-Service Drop

Meter Services

\$0.812500 Installation \$0.812500 Maintenance \$4,875000 Equipment \$6.500000 Subtotal

The Company has the option to price service in the billing months of May and October at lower levels, which levels shall not be less than marginal cost. Any shoulder consumption remaining from October usage will be billed at the summer shoulder price in following billing months.

Summer billing months are May through October and winter billing months are November through April.

The summer On-Peak period is 1:00 p.m. to 6:00 p.m., Monday through Friday (excluding Memorial Day, Independence Day, and Labor Day). The summer Shoulder period is 6:00 p.m. to 8:00 p.m., Monday through Friday (excluding Memorial Day, Independence Day, and Labor Day). The winter On-Peak periods are 7:00 a.m. - 11:00 a.m. and 6:00 p.m. - 9:00 p.m., Monday through Friday (excluding Thanksgiving Day, Christmas Day, and New Year's Day). All other hours are Off-Peak. If a holiday fails on Saturday, the preceding Friday is designated Off-Peak; if a holiday falls on Sunday, the following Monday is designated Off-Peak.

ADJUSTMENT FOR TRANSFORMER OWNERSHIP AND METERING

1. When Company owns transformers and energy is metered on primary side of transformers, the demand snall be metered and the above schedule subject to a discount of 10.3¢ per kW per month of the billing demand each month.

Tucson, Arizona

Revision No		
Effective:		

STANDARD OFFER GENERAL SERVICE TIME-OF-USE SCHEDULE NO. 76

- 2. When Customer owns transformers and energy is metered on primary side of transformers, the demand shall be metered and the above schedule subject to a discount of 20.6¢ per kW per month of the billing demand each month.
- 3. When Customer owns transformers and, at Company's option, energy is metered on secondary side of transformers, the demand shall be metered and the above schedule subject to a discount of 10.3¢ per kW per month of the billing demand each month.

MARKET GENERATION COMPONENT (MGC)

Generation shall further be unbundled between the MGC and the Interim Transition Charge (ITC). The MGC represents a forecast of the market price of generation, usage patterns, ancillary services, capacity reserves, and other necessary generation costs. The MGC shall be filed for each rate class thirty (30) days before the beginning of the subsequent calendar year. The difference between the unbundled generation component and the MGC is the ITC as provided for in the Company's Settlement Agreement.

ARIZONA INDEPENDENT SCHEDULING ADMINISTRATOR (AISA) CHARGE

A charge of \$0.00004473 per kWh shall be applied for costs associated with the implementation of the AISA in Arizona.

TAX CLAUSE

To the charges computed under the above prices, including any adjustments, shall be added the applicable proportionate part of any taxes or governmental impositions which are or may in the future be assessed on the basis of gross revenues of the Company and/or the price or revenue from the electric energy or service sold and/or the volume of energy generated or purchased for sale and/or sold hereunder.

RULES AND REGULATIONS

Service Connection Charges

- 1. There shall be a \$13.50 charge for the initial establishment of each new service for each Customer.
- 2. There shall be a \$13.50 charge for the re-establishment of each service for each Customer.

The standard Rules and Regulations of the Company as on file from time to time with the Arizona Corporation Commission shall apply where not inconsistent with this Schedule.

The Company may require a written contract and a minimum term of contract.

Optional price schedules are or may become available for certain classes of Customers. Upon application for service or upon request the Company will assist the Customer in selecting the price schedule best suited to the Customer's requirements, but the Company does not guarantee that Customers will be served under the most favorable price schedule. Upon written notification of any material changes in Customer's installation, load conditions, or use of service. Company will assist in determining if a change in price schedule is desirable, but not more than one such change in price schedule will be made within any twelve month period.

This Schedule requires a type of meter not normally used: therefore, the Company makes no guarantee that the meters will be installed within any specific time. However, the Company will make its best effort to install the special meter within a reasonable time.

The difference between the unbundled generation component and the MGC is the ITC as provided for in the Company's Settlement Agreement.

ARIZONA INDEPENDENT SCHEDULING ADMINISTRATOR (AISA) CHARGE

A charge of \$0.00004473 per kWh shall be applied for costs associated with the implementation of the AISA in Arizona.

TAX CLAUSE

To the charges computed under the above prices, including any adjustments, shall be added the applicable proportionate part of any taxes or governmental impositions which are or may in the future be assessed on the basis of gross revenues of the Company and/or the price or revenue from the electric energy or service sold and/or the volume of energy generated or purchased for sale and/or sold hereunder.

STANDARD OFFER TIME-OF-USE LARGE GENERAL SERVICE SCHEDULE NO. 85 (FROZEN)

RULES AND REGULATIONS

The standard Rules and Regulations of the Company as on file from time to time with the Arizona Corporation Commission shall apply where not inconsistent with this Schedule.

The Company shall require a written contract and a minimum term of contract.

Optional price schedules are or may become available for certain classes of Customers. Upon application for service or upon request the Company will assist the Customer in selecting the price schedule best suited to the Customer's requirements, but Company does not guarantee that Customers will be served under the most favorable schedule. Upon written notification of any material changes in Customer's installation, load conditions, or use of service, the Company shall assist in determining if a change in schedule is desirable, but not more than one such change shall be made within any twelve month period.

*This Schedule requires a type of meter that is not normally used; therefore, the Company makes no guarantee that meters shall be installed within any specific time. However, the Company shall make its best effort to install the special meter within a reasonable time.

Demand-Side Management, Uncollectible Accounts, Customer Information and Lifeline Discount are collectively referred to as the System Benefit Charge (SBC).

Additional charges may be directly assigned to a customer pursuant to its contract.

Excess shoulder demand is defined as that positive amount (if any) by which shoulder demand exceeds 150% of on-peak period demand.

Excess off-peak demand is defined as:

- that positive amount by which off-peak period demand exceeds shoulder period demand (when and if shoulder period demand is greater than 150% of the on-peak period demand and off-peak period demand exceeds shoulder period demand),
- that positive amount by which off-peak period demand exceeds 150% of the on-peak period demand (when and if shoulder period demand is less than 150% of the on-peak period demand and off-peak period demand exceeds 150% of the on-peak period demand), or;
- 3. zero when the above conditions in I are not met and the above conditions in II are not met.

In the event that excess shoulder and/or excess off-peak demand occur, excess shoulder demand shall be billed at the shoulder price and excess off-peak demand shall be billed at the off-peak price.

Any shoulder consumption remaining from October usage shall be billed at the summer shoulder price in following billing months.

Summer billing months are May through October and winter billing months are November through April.

The summer On-Peak period is 1:00 p.m. to 6:00 p.m.. Monday through Friday (excluding Memorial Day, Independence Day, and Labor Day). The summer Shoulder period is 6:00 p.m. to 8:00 p.m.. Monday through Friday (excluding Memorial Day, Independence Day, and Labor Day). The winter On-Peak periods are 7:00 a.m. - 11:00 a.m. and 6:00 p.m. - 9:00 p.m.. Monday through Friday (excluding Thanksgiving Day, Christmas Day, and New Year's Day). All other hours are Off-Peak. If a holiday fails

STANDARD OFFER TIME-OF-USE LARGE LIGHT AND POWER SCHEDULE NO. 90A

on Saturday, the preceding Friday is designated Off-Peak; if a holiday falls on Sunday, the following Monday is designated Off-Peak.

BILLING DEMAND

The billing demand shall be specified in the contract, but shall not be less than 3,000 kW. Additionally, the On-Peak billing demand shall not be less than 66.67% of the maximum On-Peak billing demand in the preceding eleven (11) months, unless otherwise specified in the contract.

POWER FACTOR ADJUSTMENT

Prices are subject to a discount or a charge of 1.3¢ per kW of billing demand for each 1% the average monthly power factor is above or below 90% lagging to a maximum discount of 13.0¢ per kW of billing demand per month.

MARKET GENERATION COMPONENT (MGC)

Generation shall further be unbundled between the MGC and the Interim Transition Charge (ITC). The MGC represents a forecast of the market price of generation, usage patterns, ancillary services, capacity reserves, and other necessary generation costs. The MGC shall be filed for each rate class thirty (30) days before the beginning of the subsequent calendar year. The difference between the unbundled generation component and the MGC is the ITC as provided for in the Company's Settlement Agreement.

ARIZONA INDEPENDENT SCHEDULING ADMINISTRATOR (AISA) CHARGE

A charge of \$0.00004473 per kWh shall be applied for costs associated with the implementation of the AISA in Arizona.

TAX CLAUSE

STANDARD OFFER SPECIAL RESIDENTIAL SCHEDULE NO. 201

AVAILABILITY

In all territory served by Company at all points where facilities of adequate capacity and the required phase and suitable voltage are adjacent to the premises served. Direct access to the meter during normal working hours is also a prerequisite for Options B & C of this Schedule.

APPLICABILITY

To single phase or three phase (Option A only) (subject to availability at point of delivery) residential electric service in individual private dwellings when all service is supplied at one point of delivery and energy is metered through one meter. Additionally, this Schedule requires that the customer use exclusively the Company's service for all space heating and all water heating energy requirements except as provided below and that the customer's home conform to the standards of the Good Cents program as in effect at the time of subscription to this Schedule. Notwithstanding the above, the customer's use of solar energy for any purpose shall not preclude subscription to this Schedule. Three different Options are available under this Schedule: A, B, & C. Subscription eligibility requirements are as follows:

Option A:

Customer must meet conditions outlined above.

Option B:

Customer must meet conditions required for option A and must purchase under the time-of-use structure applicable to

Option B. Applicable only to single phase service.

Option C:

Customer must meet above conditions required for option A, must use either (i.) solar equipment for water heating requirements during the year or (ii.) an electric heat pump water heater, or both (i.) and (ii.), and must purchase under the

time-of-use structure applicable to Option C. Applicable only to single phase service.

Not applicable to resale, breakdown, temporary, standby, or auxiliary service or service to individual motors exceeding 40 amperes at a rating of 230 volts or which will cause excessive voltage fluctuations.

Service under Option B or Option C of this Schedule will commence when the appropriate meter has been installed.* Customers must stay on Option B or Option C of this Schedule for a minimum period of one (1) year. A Customer, at his/her discretion and after being served for a twelve (12) month period under Option B or Option C of this Schedule, may opt to switch service to the non-time-of-use Option A of this Schedule. The Company shall refund to the Customer any excess moneys paid in total over the entire twelve months under Rate No. 201, Option B or Option C that would not have been paid under Rate No. 1. A Customer shall be eligible to receive such a refund of excess moneys on a single occasion only.

CHARACTER OF SERVICE

Option A:

Single or three phase, 60 Hertz, nominal 120/240 volts.

Option B:

Single phase only, 60 Herrz, nominal 120/240 voits.

STANDARD OFFER SPECIAL RESIDENTIAL SCHEDULE NO. 201

Demand-Side Management, Uncoilectible Accounts, Customer Information and Lifeline Discount are coilectively referred to as the System Benefit Charge (SBC).

The Company has the option to price service in the billing months of May and October at lower levels, which levels shall not be less than marginal cost. Any shoulder consumption remaining from October usage will be billed at the shoulder summer shoulder price in following billing months.

The summer On-Peak period is 1:00 p.m. to 6:00 p.m., Monday through Friday (excluding Memorial Day, Independence Day, and Labor Day). The summer Shoulder period is 6:00 p.m. to 8:00 p.m., Monday through Friday (excluding Memorial Day, Independence Day, and Labor Day). The winter On-Peak periods are 7:00 a.m. - 11:00 a.m. and 6:00 p.m. - 9:00 p.m., Monday through Friday (excluding Thanksgiving Day, Christmas Day, and New Year's Day). All other hours are Off-Peak. If a holiday falls on Saturday, the preceding Friday is designated Off-Peak; if a holiday falls on Sunday, the following Monday is designated Off-Peak.

MARKET GENERATION COMPONENT (MGC) - Applies to all Options

Generation shall further be unbundled between the MGC and the Interim Transition Charge (ITC). The MGC represents a forecast of the market price of generation, usage patterns, ancillary services, capacity reserves, and other necessary generation costs. The MGC shall be filed for each rate class thirty (30) days before the beginning of the subsequent calendar year. The difference between the unbundled generation component and the MGC is the ITC as provided for in the Company's Settlement Agreement.

ARIZONA INDEPENDENT SCHEDULING ADMINISTRATOR (AISA) CHARGE

A charge of \$0.00004473 per kWh shall be applied for costs associated with the implementation of the AISA in Arizona.

TAX CLAUSE - Applies to all Options

To the charges computed under the above prices, including any adjustments, shall be added the applicable proportionate part of any taxes or governmental impositions which are or may in the future be assessed on the basis of gross revenues of the Company and/or the price or revenue from the electric energy or service sold and/or the volume of energy generated or purchased for sale and/or sold hereunder.

RULES AND REGULATIONS - Applies to all Options

Service Connection Charges

- There shall be a \$13.50 charge for the initial establishment of each new service for each Customer. 1.
- There shall be a \$13.50 charge for the re-establishment of each service for each Customer. 2.

The standard Rules and Regulations of the Company as on file from time to time with the Arizona Corporation Commission shall apply where not inconsistent with this Schedule.

Optional price schedules are or may become available for certain classes of Customers. Upon application for service or upon request the Company will assist the Customer in selecting the price schedule best suited to the Customer's requirements, but Company does not guarantee that Customers will be served under the most favorable schedule. Upon written notification of any material changes in Customer's installation, load conditions, or use of service, the Company shall assist in determining if a change in schedule is desirable. but not more than one such change shall be made within any twelve month period.
